

CUMC Stream Team

Goal: To share the worship service on YouTube with those unable to attend in person - for whatever reason - wherever they are - whenever they choose.

The CUMC Stream Team: Each week during the 10:00 am service, two members of the Stream Team sit in the Balcony and operate the controls to produce the church's "live stream."

Each week the team will study the bulletin and decide on appropriate "shots" to use. They will also prepare "overlays" of hymns, scriptures, and titles to assist viewers in following the service. Modern High Definition cameras and sophisticated Computer switching equipment make it surprisingly easy to put a polished video on the internet.

The Stream Team was formed in response to the pandemic. None of the current team members had a background in TV production before we started. New members are paired with veterans for training.

On an average Sunday, the stream receives about 20 views in real time and approximately 80 more throughout the week.
